TRANSPORTATION & LOGISTICS

AU-MEX arranges cost-effective and reliable carriage for all shipments. AU-MEX's transportation team works closely with our marketing representatives to develop competitive quotes for freight rates. The team's responsibilities cover much ground, from evaluating transit schedules and the accessibility of vessels to overseeing every order form from the time of placement to its prompt arrival at the client's door. It includes determining the best manner of shipping each order, either by container or truck, and the most suitable carrier.
