

SAUNA PROFILE - TECHNICAL INFORMATION

Western red cedar (*thuja*)

Western red cedar is the ideal material for the sauna. It does not exude resin, repels water and does not overheat. Red cedar is known for its pleasantly rich aroma and the wood's popular reddish colour in many natural shades. Offered in a Softline siding profile with an extended tongue and groove and, due to the high stability of the wood, as a traditional siding.

Technical information:

Coniferous, without resinous canals, wood soft and light, heartwood pinkish brown to reddish brown, sapwood narrow - whitish, characteristic odour

Grade A

Average density	0,375 g.cm ⁻³
Longitudinal drying out	0,2 %
Radial drying out	2,4 %
Drying out in tangential direction	5 %
Volumetric slump	7,6 %
Durability class	2-3

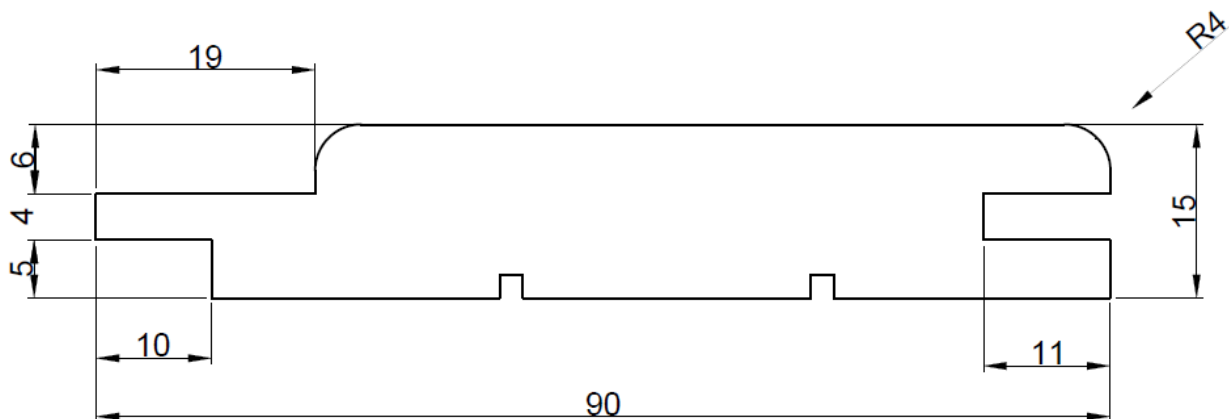

1. Sauna profile- softline profile

Dimensions: 15 x 90 mm

Lengths: 915, 1219, 1524, 1828, 2133, 2438, 2743, 3048 mm

Packing: 1 ks
